# The Layton Turnkey Solution

A Division of Layton Manufacturing, Inc.

#### Magna-Weigh System

The load cell-equipped Magna-Weigh system provides steady, precise output of the product.

### The Layton Turnkey Solution

The Layton Turnkey Solution is a product handling and distribution line that feeds into a scale. It starts with the hopper feeder that regulates product flow and reduces line surges. The ribbon-wall incline belt transports product upward for further processing.

#### **Uni-Vibe Feeder**

The uni-vibe scale feeder features a single moving part construction that ensures sanitary operation with exceptionally low maintenance and superior vibration isolation.

Scan to Learn

The belt transports packaged product to the Rotary Pack-Off Station for Case

Packaging or other solutions.

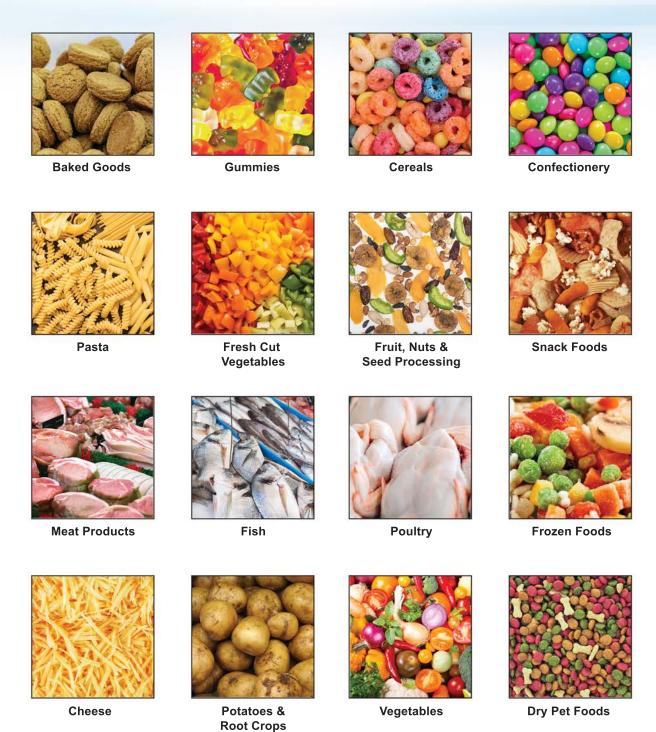

#### Scale Platform

This OSHA compliant and custom designed platform meets all safety standards.

The product is fed into the uni-vibe scale feeder which features a single moving part construction that ensures sanitary operation with exceptionally low maintenance and superior vibration isolation. After processing the final product is delivered to the pack-off table.
